CONSERVATION PROGRAM Residential Lighting (CFL & LED)

ENERGY STAR CFLs and Linear Fluorescent Fixtures

Compact Fluorescent Lamps (CFLs) must be more than 5 watts, ENERGY STAR-qualified and installed in a residential building.

General purpose and specialty CFLs are both eligible. Specialty CFLs are defined as the following screw-base bulbs: Decorative and mini base, Three-way, Reflector and outdoor CFLs. Note: T-2s, A-lamps and dimmable CFLs are general purpose, not specialty.

Linear fluorescent fixtures must be ENERGY STAR-qualified High Performance T8. Qualified fixtures may be found on the Linear Fluorescent Fixture Qualified Products List in the Document Library. The Linear Fluorescent Fixture measures are available only for Retail distribution. The Linear Fluorescent may be direct Install per the Measure Distribution Processes section in the Multi-Sector chapter. Direct Install measures also are categorized by the RTF using the Regional Building Stock Assessment (RBSA) as Exterior, Moderate/High-Use Interior or Low-Use Interior.

ENERGY STAR Solid-State Lighting/Light Emitting Diodes Bulbs and Fixtures.

Solid state lighting, also known as light emitting diodes (LED) bulbs, must be ENERGY STAR qualified or listed on the Lighting Design Lab (LDL) Qualified LED Lamp List as integral omnidirectional, directional or decorative, and must have corresponding measures on the UES Measure List in the Document Library.

LED bulbs may be Direct Install. Direct Install installations must follow the Measure Distribution Processes section in the Multi-Sector chapter. Direct Install measures are also categorized by the RTF using the RBSA as Exterior, Moderate/High-Use Interior or Low-Use Interior.

LED Fixtures must be ENERGY STAR qualified or listed on the Lighting Design Lab (LDL) Qualified LED Lamp List, with corresponding measures on the UES Measure List in the Document Library.
