CONSERVATION PROGRAM

PIPE INSULATION REBATE PROGRAM

This measure is available for all types of residential buildings (single-family, manufactured and multifamily) with an electric water heater. Customers may claim only one measure per project. Both Short and Whole House insulation measures must meet the following requirements:

- Hot and cold pipes must be insulated with a minimum of R-3 closed cell foam insulation for at least the first three feet past the water heater and if accessible, up to six feet adjacent to the water heater.
- Insulation material, jackets or facing, and adhesive (if used) must have a flame spread/smoke density rating in accordance with ASTM E-84.
- Pipe insulation must not cover pressure relief valves, handles, safety drain valves or any other safety control device.
- All pipe elbows and joints must be mitered to ensure coverage at the same thickness as straight runs.
- Pipe insulation must be secured with twine, corrosion resistant wire, or plastic compression ties every 12 inches and within three inches of the ends.

For the Whole House insulation measure, insulation must be installed on all accessible hot water pipes. If hot water pipes (trunk and branch lines) are already covered with floor or attic insulation, the project is not eligible.

PIPE INSULATION REBATE APPLICATION

Name of Applicant: _____ Name of Contractor: _____

Applicant Address: _____ Contractor Address: _____

Applicant Phone # _____ Contractor Phone: _____

City Utility Account #: _____ Site/Project Address: _____

Existing Electric Water Heater: Yes No

Pipe Insulation

- Short (3-6 foot minimum, hot and cold water pipes) or
- Whole House (trunk lines and all exposed hot water pipe).
