CONSERVATION PROGRAM

NEEM / ENERGY STAR® MANUFACTURED HOMES

Northwest home manufacturers, the region's electric and gas utilities, and the Northwest states have teamed up to offer home buyers certified energy-efficient manufactured homes. NEEM and Energy Star ® labeled manufactured homes are built to save 30 percent on heating bills, compared to manufactured homes built to federal standards.

These homes meet or exceed the same strict energy saving standards to which site-built homes are constructed. A few of the features are:

- Increased insulation levels in the ceiling, floor and walls.
- Energy efficient, low-e double pane vinyl windows.
- Insulated & sealed entry doors.
- · Sealed and tested heating ducts.

Revision Date: 10-2-13

Tighter overall construction to reduce drafts.

The NEEM and Energy Star ® labels mean the Department of Energy for Idaho, Washington, Oregon or California has approved design plans for the home, made inspections at the plant and will provide support for energy-efficiency features after you buy the home.

The City of McCleary offers a \$850 rebate to customers who purchase NEEM certified manufactured homes that are installed in the City's service area. The primary source of heat in the home must be permanently installed electric heat to be eligible. Applications must be received within 60 days of the occupancy date.
